Project Description: Please include in the space provided below a brief summary of your project and the specific use of requested funds.

As I mentioned in our last year's application submission, we have done an assessment of our various outbuildings to determine what projects need to be done and their order. Again, as stated last year, we have numerous outbuildings besides our two large buildings, the hotel and barn. All buildings house the many varied donations that we have received from the community.

Last year we requested \$7,000 from the LFNC Foundation for the replacement of our sliding garage doors on our Food Court with overhead doors which would be more secure and tight. The current large sliding garage doors are 60 + years old. Presently, one of the sliding doors slides into the opening of the other door so that we can not open it more than three feet without impacting the entranceway of the other door.

This area, our Food Court, has been slated by our Property Committee for many renovations to this building. Last year we replaced all the windows in this building. When the sliding doors have been replaced, our plan is to place siding on the entire building which will stop the need for painting and future maintenance needs.
