INTERVENTION

Intervention encompasses the initial steps for drug and alcohol services. The goal is to assist the individual to recognize, to identify and to engage the problems related to substance abuse. Intervention services identify the fact that support is needed not only for the individual but also for their family environments.

Allentown Health Bureau: provides confidential counseling and testing for HIV - the virus that causes AIDS - screening and treatment for sexually transmitted diseases, tuberculosis testing, Hepatitis B and C screening, Hepatitis B immunization and a wide range of STD and HIV/AIDS prevention education services.

PREVENTION

“Prevention promotes constructive lifestyles that discourage drug abuse and promotes development of social environments that facilitate drug-free lifestyles. As applied to alcohol, tobacco and other drugs (ATOD), prevention means keeping the many problems related to the use and abuse of these substances from occurring.” (CASP)

Center for Humanistic Change: provides educational programs to prevent substance abuse. Programs include: life skills for adults and youth, parenting education, violence prevention, and alternative activities for teens and education targeted to avert drug and alcohol involvement. Programs and trainings are offered in the schools and community as classroom programs, small groups and one-time presentations.

555 Union Blvd., Suite 7
